35024b Vibrational spectra of bis(ammonia)- and bis(trimethylamine)boronium iodide. Bratt, Peter J.; Brown, Michael P.; Seddon, Kenneth R. (Donnan Lab., Univ. Liverpool, Liverpool, Engl.). *J. Inorg. Nucl. Chem.* 1975, 37(4), 887-9. (Eng). The ir and Raman spectra of $[(\text{NH}_3)_2\text{BH}_2]^+$ and the ir spectrum of $[(\text{Me}_3\text{N})_2\text{BH}_2]^+$ were studied. Vibrational assignments were proposed using the group vibration approxn.
